

Orange Star Tank instructions

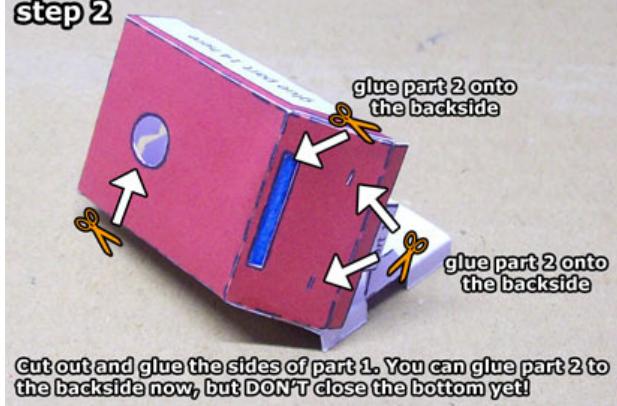

Step 1

After printing the parts (preferably on thicker paper, I use 200 gsm) gather your papercrafting tools!

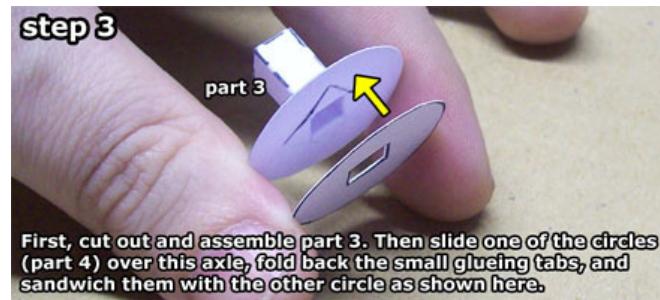

Step 2

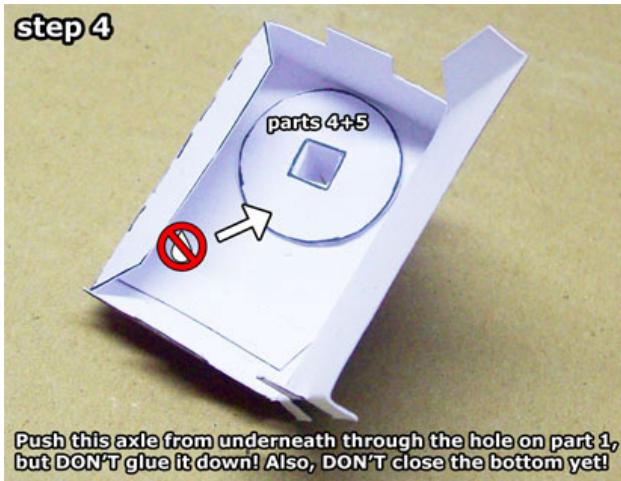

Cut out and glue the sides of part 1. You can glue part 2 to the backside now, but DON'T close the bottom yet!

Step 3

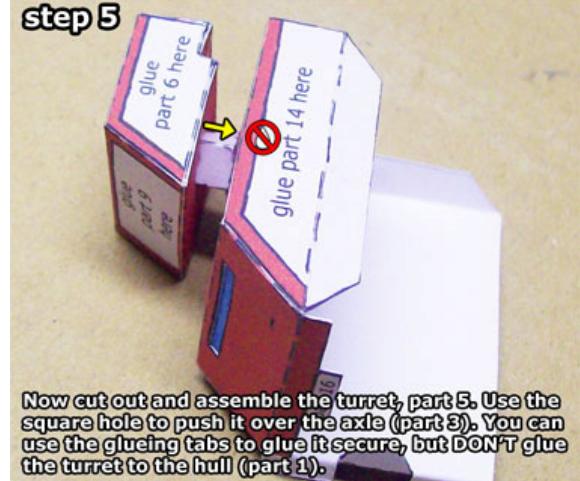

First, cut out and assemble part 3. Then slide one of the circles (part 4) over this axle, fold back the small glueing tabs, and sandwich them with the other circle as shown here.

Step 4

Push this axle from underneath through the hole on part 1, but DON'T glue it down! Also, DON'T close the bottom yet!

Step 5

Now cut out and assemble the turret, part 5. Use the square hole to push it over the axle (part 3). You can use the glueing tabs to glue it secure, but DON'T glue the turret to the hull (part 1).

Step 6

Now you can *finally* close the bottom of part 1 as shown here. ;o)

Step 7

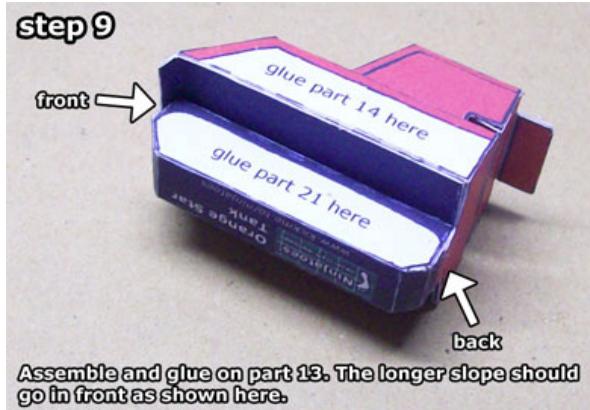

Now glue parts 6+7 (to the sides) and part 8 (on top) to the turret.

step 8

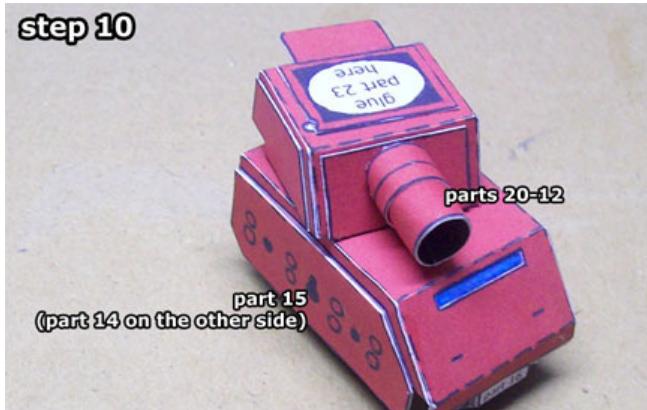

Then glue part 9 to the front of the turret, and cut out and assemble the parts for the cannon (parts 10-12).

step 9

Assemble and glue on part 13. The longer slope should go in front as shown here.

step 10

If you know anything about tanks, you'll know where to glue the cannon. :o) Also cut out and glue parts 14+15 to the sides of the hull (after folding them double).

step 11

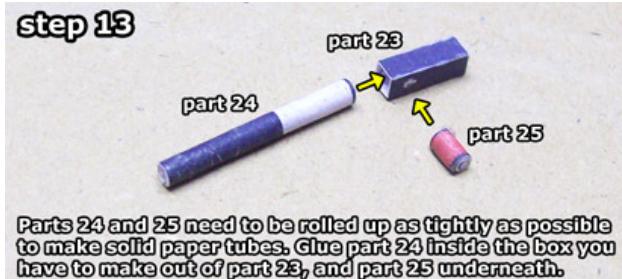

Cut out and glue on parts 16-18 (push the bottom of parts 17 and 18 through the slits on part 1).

step 12

To make the treads, assemble parts 19 and 21, and then glue on parts 20 and 22. Then glue the treads underneath the hull, between parts 14 and 15 and part 13.

step 13

Parts 24 and 25 need to be rolled up as tightly as possible to make solid paper tubes. Glue part 24 inside the box you have to make out of part 23, and part 25 underneath.

step 14

After that, you can glue the machine gun you made on top of the tank like so.

step 15

Cut out and assemble the parts for the tank driver, and then glue them together.

step 16

Glue the tank driver on top of the tank to finish your Orange Star Tank! ;o)

Thank you for building a Ninjatoes' papercraft model!
